

# Keep Ramapo Waterways Clean

---

## What Happens:

Many people believe that a storm drain will carry waste to a sewage treatment plant for cleanup. This is not true. In fact, every storm drain in Rockland County carries rainwater into the nearest stream, lake, wetland, river or reservoir and ultimately into the drinking water supply.

## What to Do:

Materials such as used motor oil, paints, pesticides and antifreeze should be properly disposed at the Household Hazardous Waste Facility (845-364-2444) located at the Rockland County Fire Training Center.

Leaves, yard waste, litter and dirt also are harmful, damage water quality and should be kept out of our waterways.

For more information, please call the Town of Ramapo Department of Public Works at 845-357-0951.
